

## Jampilen RP210G

Random Copolymer

### Description:

"Jampilen RP210G" is a medium modified polypropylene random copolymer. The product is designed for the extrusion of film and sheet and for blow molding of small and medium sized items. The processability of this grade is excellent and the items produced with it show good impact strength, good clarity and high gloss. "Jampilen RP210G" also offers the advantages typical of polypropylene: low density, stress cracking resistance (ESCR) and high chemical resistance. "Jampilen RP210G" is suitable for food contact.

### Processing Method:

Injection and extrusion blow molding  
Extrusion (Sheet, pipe, semi finished products)  
Double bubble film

### Features:

Excellent processability  
Good chemical resistance  
High gloss  
High ESCR  
Random copolymer

### Typical Applications:

Film for packaging  
Sheet for stationery folders and displays  
Blow molding of high gloss monolayer bottles, clear or pigmented, for the packaging of cosmetics, detergents, chemicals and food-stuffs  
Thermoformed food containers  
Double bubble shrink film

### Approval:

Food
